DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 31-34 drawn to textured yarns, staple fibers, or single and/or multi-component yarns class 428, subclass 357+.
 - II. Claims 12-21,29,30 and 48-51 drawn to non-woven fabric classified in class, 442 subclass 327+.
 - III. Claims 22-28 and 52-54 drawn to filtration and coalescing media classified in class, 210 subclass various.

Note: claims 22-28 and 35-47 encompass a plethora of compositions, products, and processes, and apparatuses placing them outside the scope intended by 35 U.S.C. 101. Thus, these claims are not subject to restriction at this time.

2. The inventions are distinct, each from the other because:

The inventions of Groups I and (II & III) are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product of textured yarns, staple fibers, or single and/or multi-component yarns is deemed a useful component in fiber-reinforced structures, building materials and laminates. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions of Groups (I & II) and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate non-woven product comprising the textured yarns, staple fibers, or single and/or multi-component is useful component in textile laminates such as those used in disposable personal care articles or in medical applications. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. If applicant elects Group I or II, this application contains claims directed to the following patentably distinct species of the claimed invention: Group I, textured yarns, staple fibers, or single and/or multi-component yarns made from a polymer blend, claims 31-34 and Group II, non-woven comprising yarns made from a blended polymer, claims 48-51.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Group I, claims 1-11, Group II, claims 12-21, 29 and 30 and Group III, 52-54 are directed to the generic substrate.

4. A telephone call was made to Charles Quinn on July 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the reply to this requirement to complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda M Salvatore whose telephone number is 703-305-4070. The examiner can normally be reached on M-F.
